

# Alphabet Fun Cards

This set of alphabet cards will provide hours of fun.

Print a set for each child on card stock. Discuss the letter, the sound and the word. Have the child draw the picture of each word above it. Hint: on the word **under** have the child draw a line across the card and an arrow pointing below the line.

Children retain more information when education is hands-on. This set will encourage letter recognition, sound recognition - even word recognition since they are drawing their own version of the word.

This set will also introduce important areas of education. **Under** will introduce space differentiation, **penny** will introduce money, **yellow** will be an introduction or reminder of colors, etc..... Use this set to work on themes or to reinforce what you have already introduced.

Enjoy your time with the children and always have fun!
